

JACK SLAMER

Infosheet

Since 2007 Jack Slamer has been playing hundreds of shows on stages in Switzerland and neighboring countries. After releasing four albums, including two on the German label Nuclear Blast and the first lineup change in the band's history, Jack Slamer is about to start a new chapter.

Over the last few months they have worked intensively on new music and further developed the band's sound. Finally, Jack Slamer went into the studio at the end of 2023 to record four songs. These reflect the full range of Jack Slamer's new musical universe. They sound more modern and melodic, but don't lose any of the power and urgency that are among the band's trademarks.

1. Street Life (3:19)
2. Future's Ground (5:12)
3. The Mirror (4:30)
4. Words Become Ashes (4:53)
